SUMMARY

Career changer in web development with a background in journalism and a strong interest in technical solutions. Currently completing an intensive full-time training program to become a Fullstack Developer, focusing on JavaScript, Node.js, TypeScript, React, and MongoDB.

During my training, I have completed several practical projects, including:
- A responsive pet products webshop built with React and Redux;
- A full-stack photo-sharing platform using Node.js, TypeScript, and MongoDB.

I bring a keen eye for clean code, good structure, and user-friendly design—skills I transfer from journalism to IT. I am seeking a full-time or remote position in Austria, preferably within a team where I can further develop and consolidate my skills.

PROJECTS

Fullstack Social Media Application (Ichgram) | *July 2025*

- Developed a platform similar to Instagram, using React, TypeScript, and Redux for the frontend, and Node.js, Express, and MongoDB for the backend.
- Implemented user authentication, post creation, likes, and comments with JWT-based security.
- Applied RESTful API design, state management, and a responsive UI to deliver a functional and interactive platform.

E-Commerce Website for Pet Products | *May 2025*

- Developed an e-commerce website for pet products featuring a catalog, shopping cart, and user authentication.
- Used React, Redux Toolkit, React Router, and Axios for state management and API integration.
- Optimized API data loading, improving performance by 30%.
- Created a responsive interface and enhanced UX/UI, increasing user engagement and session duration.

SKILLS & COMPETENCIES

- Structured Work Approach: writing clean code in React/Node projects, maintaining clear documentation
- Communication: conducted interviews, coordinated teams within project contexts
- Independent Learning: self-taught IT stack, solved complex problems

- English – B2
- German – B1

EDUCATION

IT Career Hub Germany | *October 2024 – August 2025*

Web Application Development

- Frontend: HTML, CSS (SASS), JavaScript, React, TypeScript
- Backend: Node.js, SQL, NoSQL (MongoDB), API, REST
- DevOps: Linux, Docker, AWS, Git, CI/CD, Automation
- Management: Scrum, IT Processes, Project Management
- Additional: Algorithms, UX/UI

National V. N. Karazin University, Kharkiv, Ukraine | *September 2015 – January 2020*

Master's Degree in Journalism

- Produced over 200 news articles – demonstrating precise information processing and ability to work under tight deadlines
- Conducted interviews – strong communication skills and teamwork
- Edited and designed content using Premiere Pro & Photoshop – technical proficiency and creative problem-solving

---
